

91503/915

TEMPEST™ BLENDERS

Model 91503

Model 915

Best Warranty In The Industry...

Nothing compares to the peace of mind you get from owning a blender backed by the industry's best warranty: 3 year parts/3 year labor or 25,000 cycles, whichever comes first.

Extra Warranty Protection...

The motor drive coupling and patented quad-angle, stainless steel blade are both warranted to be free from defects in material and workmanship for the life of the part.

9 Program Cycles With Auto Off...

Model 91503 Includes nine preset timed cycles: eight cycles automatically ramp up from low to high speed; the ninth cycle runs on high for 20 seconds. The low speed ensures better mixing of ingredients before the cycle boosts its speed to high for fine blending and crushing. At the end of each cycle, the blender automatically shuts off.

Electronic Speed Control...

91503 provides constant speed regardless of the load. The sensor monitors the motor load and increases or decreases motor torque continuously for consistent blending quality.

Two-Speed Power...

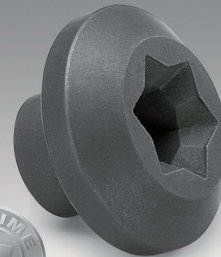

Model 915 has two-speed versatility with pulse option provides precise blending every time.

Patented Stackable Container...

Durable 32 oz. polycarbonate container with multi-directional pouring, measurement markings, and vinyl lid with filler-cap.

Lifetime warranty on motor drive coupling

*The Tempest™ motor drive coupling is warranted to be free from defects in material and workmanship for the life of the product. We will, at our option and at our cost, either repair or replace the motor drive coupling demonstrated to be defective in material or workmanship or substitute the motor drive coupling shown to be defective with a part of equal or greater value. This motor drive coupling warranty applies only to Tempest™ blenders manufactured after January 1, 2002. Other restrictions apply, see the operation manual for details.
